## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Molybdenum Powder market for 2018-2023. Molybdenum (Mo) is a silvery-white shiny metal, hard but at the same time softer and more flexible than tungsten. It has an excellent resistance to corrosion, good wear and resistance to abrasion, and superior thermal and electrical properties. It is an essential element when it comes to alloys, as it enhances hardenability and persistence of tempered and destroyed steels.

Molybdenum Powder product demand market has a certain space, but basically showing the scarcity of high-end products, low-end products, excess capacity, there is a large market demand for high-end products to seize market share, local enterprises export more low-end products over capacity or molding process basic Materials.

In 2016, Europe is the largest supplier with Production market share of 35.69% in 2016, and Europe is the consumption market of Molybdenum Powder with Consumption market share of 34.75% due to the great demand.

In recent years, the price of Molybdenum Powder is increasing slowly due to the limited resources.

Over the next five years, LPI(LP Information) projects that Molybdenum Powder will register a 4.5% CAGR in terms of revenue, reach US\$ 870 million by 2023, from US\$ 670 million in 2017.
