Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information studies the present scenario (with the base year being 2017) and the growth prospects of global Music Publishing market for 2018-2023.

This report studies the Music Publishing market, Music publishing involves music recording, merchandizing, publishing, and distributing musical content. To publish the musical content, music publisher requires a copyright of the song along with fee, which is commonly known as royalty.

Music publishing involves the acquisition of rights to, and licensing of, musical compositions (as opposed to recordings) from songwriters, composers or other rights holders. Music publishing revenues are derived from five main royalty sources: Mechanical, Performance, Synchronization, Digital and Other. In addition, music publishing includes other responsibilities, such as acquiring songs, administering copyrights, exploiting the artistic material, and protecting copyrights.

The music publishing business is also highly competitive. The top three music publishers collectively accounted for 50% of the market. QYResearch observes that Universal Music Group, Sony/ATV Music Publishing, Warner Music Group, and BMG Rights Management are still essentially the largest participants in this market. Of the major players of Music Publishing, Universal Music Group maintained its first place in the ranking in 2017. Universal Music Group accounted for 22.47 % of the Global Music Publishing revenue market share in 2017. Other players accounted for 13.72 %, 13.21 % and 11.97 % including Sony/ATV Music Publishing, Warner Music Group and BMG Rights Management. However, after the acquisition of SONGS Music Publishing with around \$ 150 Million on December 2017, Kobalt Music will occupy larger global market share. There are many mid-sized and smaller players in the industry that represent the

balance of the market, including many individual songwriters who publish their own works.

On the whole the music publishing market is still very much in the growth phase, and is set to be moderate growth over the next years. The North America, Europe and Japan market will lead the way, followed closely by the Asia-Pacific (Ex. Japan), Latin America and Middle East & Africa markets. Over the past year, the North America, Europe and Asia-Pacific regions have shown huge potential for growth.

Over the next five years, LPI(LP Information) projects that Music Publishing will register a 7.1% CAGR in terms of revenue, reach US\$ 6550 million by 2023, from US\$ 4330 million in 2017.
