In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global N-Acetyl-L-Methionine market for 2018-2023.

N-Acetyl-L-methionine is a modified amino acid. It's a kind of fine chemical intermediate. It is widely used in chemical industry and other fields. N-acetyl-L-methionine is nutritionally and metabolically equal to L-methionine.

As international economic situation is complicated, in the next few years there will be many uncertainties although. There still many companies enter into N-Acetyl-L-Methionine industry due to the government' policy. The current demand for N-Acetyl-L-Methionine product is relatively low in the mature market, such as Europe and North America, but the demand in China is relatively lower due to the government' positive policy in food industry.

The global market is concentrated in Europe and North America. The Europe region accounts about 50% share of the global production, followed by USA.

Although sales of N-Acetyl-L-Methionine brought a lot of opportunities, the study group recommends the new entrants who just having money but without technical advantage and down-stream support, do not to enter into the N-Acetyl-L-Methionine field hastily.

Over the next five years, LPI(LP Information) projects that N-Acetyl-L-Methionine will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
