In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Nitrile Butadiene Rubber Powder market for 2018-2023.

Nitrile butadiene rubber powder is a family of powdered nitrile rubbers that are compatible with a number of different polymers and are used as plasticizers. NBR powder industry has low technology barrier and is labor intensive industry. Currently, there are several producing companies in the world acrylonitrile industry. The main market players are Omnova Solutions, LANXESS, LG Chem. The production of NBR powder will increase to 66668 MT in 2016 from 54858 MT in 2011 with average growth rate of 3.97%. Global NBR powder capacity utilization rate remained at around 70.17% in 2015.

In consumption market, the global consumption value of NBR powder increases with the 4% average growth rate. Europe and China are the mainly consumption regions due to the bigger demand of downstream applications. In 2015, these two regions occupied 52% of the global consumption volume in total.

NBR powder has mainly several production technologies, As NBR powder is main raw material of some PVC chemicals, the downstream application industries will need more NBR powder. So, NBR powder has a huge market potential in the future. Manufacturers engaged in the industry are trying to produce high purity and good performance NBR powder through improving technology. NBR powder applications include automotives, PVC modifications, footwear, consumer goods and others including coatings and tubes. In addition, NBR powder is also used in modification of resins such as ABS and phenolic resins. NBR powder has excellent oil resistance, good abrasion resistance and aging resistance. Specialty forms of NBR continue to grow with increasing applications

in different end-use industries.

Over the next five years, LPI(LP Information) projects that Nitrile Butadiene Rubber Powder will register a 1.0% CAGR in terms of revenue, reach US\$ 290 million by 2023, from US\$ 280 million in 2017.
