Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Octreotide market for 2018-2023.

Octreotide is an octapeptide that mimics natural somatostatin pharmacologically?it is a more potent inhibitor of growth hormone, glucagon, and insulin than the natural hormone. Usually in the form of a salt of acetic acid.

The production of Octreotide mainly focuses on Europe, China and India. The Europe occupies the largest share and it about reach 66.36% in 2015. Novartis exports to other countries mainly in the form of finished drug.

The Octreotide product increased fast in the past five years, the production growth in the past two years. There have been new manufacturers to enter the field year by year. But for now , it is difficult to obtain certification.

It will expect that the production and the capacity will increase fast in the future, But with octreotide acetate in China continues to mature in manufacturing technology, in the future, trade of octreotide API will gradually decrease, more and more Octreotide will sold as finished medicine.

Over the next five years, LPI(LP Information) projects that Octreotide will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.

This report presents a comprehensive overview, market shares, and growth
