In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Oil & Gas Subsea Umbilicals market for 2018-2023.

An umbilical, or umbilical cable, is a static or dynamic cable that is the vital link between subsea production and processing systems and the surface, as well as between elements within the larger subsea system via flying leads. Umbilicals are composite cables that have the ability to carry out a large range of processes. Their purpose includes: hydraulic power and chemicals; electric power; and telecommunications (fibre optics). Umbilicals are able to complete an assortment of tasks, including activating wells, managing subsea control panels, feeding information about temperatures, pressures, flows and well integrity back to the surface control teams, supplying hydraulic and electric power to wellheads and manifolds, as well as delivering chemicals to the subsea wells and into the production flows.

As Chinese overall economic downward trend in the past few years, and international economic situation is complicated, in the next few years there will be many uncertainties, and coupled with Oil & Gas Subsea Umbilicals industry in short supply on the market in the past few years, more and more companies enter into Oil & Gas Subsea Umbilicals industry, the current demand for Oil & Gas Subsea Umbilicals product is relatively low, lack of demand, excess supply. Ordinary Oil & Gas Subsea Umbilicals products on the market do not sell well; Oil & Gas Subsea Umbilicals 's price is lower than past years. The signal of market price change indicates the trend in the Oil & Gas Subsea Umbilicals industry, low-end product has excess capacity, high-end product is in short supply.

Over the next five years, LPI(LP Information) projects that Oil & Gas Subsea Umbilicals will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
