## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Organic Hair Color market for 2018-2023.

Hair color, also known as hair colorant or hair dye, is the sub-segment of the broad category of hair care products. Hair color products contribute to more than one-fifth of the global hair care market. Hair care broadly includes five types of products. These include shampoo, hair color, hair conditioner, hair styling products, and hair oil. The trend of hair care has been growing in the fashion industry due to the global aging population base.

Organic hair color is manufactured by using organic ingredients or certified organic ingredients. The ingredients are usually plant based such as henna, dry fruits, various vegetables, flower extracts, and many more. The product might either be 100% organic or many contain certain percentages of synthetic formulations. Organic hair color balances and sustains the hair shaft to prevent breakage and over drying.

Over the next five years, LPI(LP Information) projects that Organic Hair Color will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.

This report presents a comprehensive overview, market shares, and growth opportunities of Organic Hair Color market by product type, application, key manufacturers and key regions.
