Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Ozone Generator market for 2018-2023. Ozone generators work by combining oxygen (O2) with energy to produce ozone (O3). When the oxygen molecules are exposed to energy, the two atoms are broken apart. The single oxygen atoms quickly bond in groups of three to form ozone.

For industry structure analysis, the Ozone Generator industry is not concentrated. These manufacturers range from large multinational corporations to small privately owned companies compete in this industry. The top five producers account for about 34.59 % of the revenue market. Regionally, Europe is the biggest production value area of valves, also the leader in the whole Ozone Generator industry.

China occupied 29.16% of the production market in 2017. It is followed by Europe and North America, which respectively account for around 26.18% and 22.54% of the global total industry. Other countries have a smaller amount of production. Geographically, China was the largest consumption market in the world, which took about 25.52% of the global consumption volume in 2017.

For price trend analysis, a key variable in the performance of Ozone Generator producers is raw material costs, specifically the speed at which any increase can be passed through to customers.

Over the next five years, LPI(LP Information) projects that Ozone Generator will register a 1.6% CAGR in terms of revenue, reach US\$ 590 million by 2023, from US\$ 530 million in 2017.

This report presents a comprehensive overview, market shares, and growth

opportunities of Ozone Generator market by product type, application, key manufacturers and key regions.

To calculate the market size, LP Information considers value and volume generated from the sales of the following segments:

Segmentation by product type:

Large Ozone Generator (>5kg/h)

Middle Ozone Generator (100 g/h – 5 kg/h)

Small Ozone Generator (
