## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Plastic Recycling market for 2018-2023.

Recycled plastics are the plastics that made from post-consumer or post-industrial plastics instead of the virgin resin. The process of recycling used plastic from consumable products is an efficient means to reprocess the material into useful products. Many different products make great sources of recyclable material, including: soda bottles, plastic packaging, sheets and pellets. Recycled plastic is used to make many different types of products. The type of product that is made out of recycled plastic depends on the type of plastic resin. There are several different types of plastic resin used to make different products, such as PET, PP, HDPE and LDPE.

Recycled plastics can be used in various fields, like Packaging, Consumer Goods, Construction, Textile Fiber / Clothing, Landscaping / Street Furniture, etc. Textile fiber / clothing is the largest application of recycled plastics with market share of 30.81% in 2017, since nearly 80% of RPET is used to produce fiber.

Recycled plastics can be classified as PET, PP, HDPE, LDPE and others in terms of material type. HDPE and PET are the major kind of recycled plastics. The market of recycled plastic is highly separated, with China, USA and Europe as the major producing area.

The market of recycled plastic is highly fragmented with a tail of manufacturers. As the largest production area of recycled plastics, there are more than 3000 companies supply recycled plastics. The market concentration in developed areas is higher comparatively. Leading suppliers in the worldwide are Clear Path Recycling, Clean Tech Incorporated, Mohawk Industries Incorporated, CarbonLite Industries, Envision

Plastics Industries, Advanced Environmental Recycling Technologies Incorporated, Greentech and Veolia Polymers, which takes a combined share of less than 5% in 2017.

Over the next five years, LPI(LP Information) projects that Plastic Recycling will register a 5.8% CAGR in terms of revenue, reach US\$ 36000 million by 2023, from US\$ 25600 million in 2017.
