In this report, LP Information studies the present scenario (with the base year being 2017) and the growth prospects of global Point-to-Multipoint Microwave Backhaul Systems market for 2018-2023.

In telecommunications, point-to-multipoint communication (P2MP, PTMP or PMP) is communication which is accomplished via a distinct type of one-to-many connection, providing multiple paths from a single location to multiple locations.

Microwave backhaul systems are used for transferring digital data between two distributed points over a radio link. Microwave backhaul technologies are adopted by several mobile operators across the world to transfer huge data traffic over a communication links. Moreover, microwave backhaul systems are growing rapidly as they are capable to deliver large capacity of data with minimized cost.

PMP microwave solutions suit the evolving landscape of these next generation networks owing to its high capacity, rapid deployment and cost efficiency structure. Now and in the future, service providers can maximise efficiency in their backhaul and access networks with increased capacity which PMP microwave brings, as well as compelling TCO benefits which far outstrip other solutions.

The key players are CamBium Networks, Ceragon Networks Ltd, Intracom Telecom, Cambridge Broadband, Ericsson, HUAWEI, Aviat Networks Inc, Airspan, IMEC, HFCL, Comba, Exalt Wireless, Siklu and so on.

Significant and lasting barriers make entry into this market difficult. These barriers

include, but are not limited to: (i) product development costs; (ii) capital requirements; (iii) intellectual property rights; (iv) regulatory requirement; and (v) Transitions' unfair methods of competition.

Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this area, the future will still have more new investment enter the field. Even so, the market is intensely competitive .The study group recommends the new entrants just having money but without technical advantage and upstream and downstream support do not to enter into this field.

Over the next five years, LPI(LP Information) projects that Point-to-Multipoint Microwave Backhaul Systems will register a 7.7% CAGR in terms of revenue, reach US\$ 800 million by 2023, from US\$ 510 million in 2017.
