## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Polyamide Hot Melt Adhesives market for 2018-2023.

Polyamide hot melt adhesives are used in a variety of bonding applications. Polyamide hot melts have a wide range of adhesive properties, they exhibit excellent adhesion to a wide variety of materials, and bond well to porous substrates. Polyamide hot melt adhesives are used in a variety of critical applications.

The global sales of polyamide hot melt adhesives are from 77 KMT in 2013 to 93 K MT in 2017. In 2016, the global polyamide hot melt adhesives sales market was led by Europe, USA, and the major manufacturers' activities of polyamide hot melt adhesives are Henkel, H. B. Fuller, Bostik Inc, 3M Company, etc. XinXin-Adhesive Industries is the China sales leader, holding 1% sales share in 2017.

Polyamide Hot melt adhesives downstream are wide, and the major fields are shoes & textile, Automotive, woodworking, etc. In recent years, social economy has developed rapidly. For demand market of Polyamide hot melt adhesives, there is also a certain space in the next few years, especially in the Chinese market which is increasing with the rapid development of downstream industry.

The entire market is dominated by several giants. They all have a mature sales network. So the entire market is trending toward direct sales or their agents, rather than using distributors. This is observed even more acutely among foreign suppliers, who historically relied more heavily on distributor companies. But for other small manufacturers, distribution is still an important channel to expand the market. For example, Chinese enterprises are a typical example.

We tend to believe this industry is a potential industry, and the consumption increasing

degree will show a rapid growth curve. For product prices, the slow downward trend in recent years will maintain in the future as competition intensifies. Besides, prices gap between different brands will go narrowing gradually. Also, there will be fluctuation in gross margin.

Over the next five years, LPI(LP Information) projects that Polyamide Hot Melt Adhesives will register a 0.8% CAGR in terms of revenue, reach US\$ 450 million by 2023, from US\$ 430 million in 2017.
