Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Polyethylene Naphthalate (PEN) market for 2018-2023.

PEN(Polyethylene Naphthalate) is a new generation polymer and a high performance member of the polyester family. It is mainly used on three formulations, PEN Resin, PEN Film and PEN Fiber.

Overall, due to the factors like the price and production of the PEN, the PEN demand is relatively limited. At the same time, the alternatives like PET (polyethylene terephthalate) are more cost-effective, to resulting in the current situation--- Technological monopoly, limited demand and the high price.

Because the expensive price and limited applications, although the PEN has developed for six decades, but it just only very few people knows it, there are not still too many people to know its features and application.

Over the next five years, LPI(LP Information) projects that Polyethylene Naphthalate (PEN) will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
