The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Polymer Derived Ceramics market for 2018-2023.

This report studies the Polymer Derived Ceramics market, Polymer-derived ceramics (PDCs) have been developed rapidly since they were discovered over 50 years ago. PDCs exhibit important application values in several key engineering fields, such as aerospace, machinery, energy, information and microelectronics. Si-based polymer-to-ceramic transformation technique to prepare fibers, coatings, bulk materials, ceramic matrix composites and other materials. Another application using PDCs is as sintering aids for non-oxide ceramics.

The commercialized production of Polymer Derived Ceramics materials are in limited quantities, so we list the research status of some Polymer Derived Ceramics materials. In production market, the global production value has increased to 403.6 Million USD in 2017 from 315.6 Million USD in 2012.

Japan is the largest production regions of Polymer Derived Ceramics, with a production value market share nearly 80.37% in 2016.

The second place is North America; following Japan with the production value market share over 12.50% in 2016.

Over the next five years, LPI(LP Information) projects that Polymer Derived Ceramics will register a 11.5% CAGR in terms of revenue, reach US\$ 780 million by 2023, from US\$ 400 million in 2017.
