In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Polysulfone Resin market for 2018-2023. Sulfone Polymers are a family of engineering thermoplastic resins characterized by the sulfone [SO₂] group. They are a class of thermoplastic polymers, which exhibits high temperature resistance. Sulfone polymers are unique and different from the other thermoplastic materials due to its high hydrolytic stability and ability to achieve transparency.

According to our research and analysis, at present, market concentration in the industry is high. Polysulfone resin market is dominated by Solvay, Basf and Sumitomo. Solvay is the world leader, holding 57.52% production market share in 2017. Limited by technology, China manufacturer's production share is limited. Besides, compared with global famous brand, product in China has lower price and lower visibility. It still need a long time for China manufacturers to enter global market.

Sulfone polymers is wildly used in electronics and electrical, vehicle construction, food industry and medical industry. Globally, this market is mainly driven by growing demand from automotive industry and electronics industry. In 2017, electronics & electrical and vehicle construction separately consumed 27.59% and 20.40% of global total consumption.

Over the next five years, LPI(LP Information) projects that Polysulfone Resin will register a 4.3% CAGR in terms of revenue, reach US\$ 670 million by 2023, from US\$ 520 million in 2017.
