In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Powder Molding Hydraulic Press Machine market for 2018-2023.

Powder Molding Hydraulic Press Machine is suited for powder compaction applications. Powder Compaction is a flexible process that allows the end user to create a multitude of different parts at a variety of yield strengths for simple to complex shapes. It is capable of forming complex shape molded parts with uniform density throughout a varying cross section and can handle different range of powder materials. Pressing parameters can be specified by weight, density, size, or shape. In these Hydraulic Presses, powder is pushed into molds and the compound into the shape of the product. The final result of compacting process may be a simple tablet or perform or it may be a precision, high tolerance component part as intricate as a gear or special cutting tool. First, for industry structure analysis, the powder molding hydraulic press machine industry is fragmented. A variety of manufacturers ranging from large multinational corporations to small privately owned companies compete in this industry. The top ten producers account for about 32% of the revenue market. Regionally, Europe is the biggest production area of powder molding hydraulic press machine, also the leader in the whole powder molding hydraulic press machine industry.

Second, the Europe production increases from 472 Units in 2011 to 558 Units in 2016 with the average growth rate of more than 3.5%.

Third, China occupied 30.36% of the production market in 2015. It is followed by Europe and United States, which respectively have around 20.01% and 20.6% of the global total industry. Other countries have a small amount of production. Geographically,

China was the largest consumption market in the world, which took about 30.63% of the global consumption volume in 2015. Europe shared 25.41% of global total.

Over the next five years, LPI(LP Information) projects that Powder Molding Hydraulic Press Machine will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
