Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Probiotic Dietary Supplement market for 2018-2023.

Probiotics are the friendliest types of bacteria and take up residence in our body from the day we are born. Probiotics are live micro-organisms which, when administered in adequate amounts, confer a health benefit on the host. While the traditional delivery vehicle for probiotics was fresh dairy products, they are now found in many varieties of food, beverages, dietary supplements and healthcare products. In this report, the probiotic dietary supplement are counted, which include Nutrition Supplements, Food Supplements, Infant Formula, Other type probiotic dietary supplement.

The global industry is dynamic and highly competitive. Companies focus more on R&D activities to develop new products. Some of the major companies include BioGaia and Probi AB, Chr. Hansen A/S, etc. among others. The industry is characterized by a high level of integration between raw material providers, manufacturers, and supplement manufacturers. BioGaia and Probi AB show such an integration across the value chain. Suppliers play an important role in integrating the value chain by providing quality raw materials. It helps the companies to integrate their businesses in a cost-effective way and shields them from hassles associated with raw material procurement. Companies such as Chr. Hansen is a leading global supplier of scientifically documented probiotic strains for infant formula, dietary supplement and health-care companies around the world.

Currently, a major challenge affecting the market growth is the limitation of downstream market. As large demand of healthy products at home and abroad, many companies

began to enter the field. Therefore, Probiotic Dietary Supplement market share is high fragmented.

Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this area, the future will still have more new investment enter the field. In the next five years, the consumption value will keep rapid growth.

Over the next five years, LPI(LP Information) projects that Probiotic Dietary Supplement will register a 7.6% CAGR in terms of revenue, reach US\$ 4650 million by 2023, from US\$ 3000 million in 2017.
