In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Pterostilbene market for 2018-2023.

Pterostilbene (trans-3,5-dimethoxy-4-hydroxystilbene) is a naturally occurring dietary compound, part of the stilbene group of compounds and the main antioxidant component of blueberries.

Pterostilbene is a methylated stilbene molecule with structural similarity to resveratrol, the only difference being two methoxy groups on the pterostilbene molecule that replace hydroxy groups on the resveratrol molecule.

Pterostilbene is similar in structure to the anti-aging compound resveratrol; pterostilbene contains two methoxy groups and one hydroxyl group. However, pterostilbene is more bioavailable and preliminary research indicates that in some ways, it may be even more beneficial. It is widely used in the fields of dietary supplements, pharmaceutical, food & beverages and cosmeceuticals.

At present, the major manufacturers of Pterostilbene are ChromaDex, Chemill, Herb Nutritionals, K V Natural, Wuxi Cima Science, Brilliant, Taizhou Bona, Shaanxi Pioneer Biotech, Shaanxi NHK Technology, etc.

In application, Pterostilbene downstream is wide and recently Pterostilbene has acquired increasing significance in various fields of Dietary Supplements, Pharmaceutical, Food & Beverages and Cosmeceuticals and others. There is a big price gap in different application field. The United States local high-end manufacturers account for large share of the revenue market though they hold small consumption volume share of United States.

Over the next five years, LPI(LP Information) projects that Pterostilbene will register a 10.6% CAGR in terms of revenue, reach US\$ 4180 million by 2023, from US\$ 2290 million in 2017.
