Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global PTFE Tapes market for 2018-2023.

Polytetrafluoroethylene (PTFE) is a synthetic material used in a variety of industries and applications to reduce the coefficient of friction. Because of its non-stick properties and high heat resistance, PTFE is used as a non-stick coating for frying pans and other cookware. It makes an excellent insulating material for electrical applications because of its non-conductivity. PTFE is non-reactive to numerous chemicals, due to the chemical resistance of fluoropolymer bonds; making it effective in containers and pipework for reactive and corrosive substances. PTFE reduces friction, wear and energy efficiency of machinery. Because of its low friction, PTFE is used in industrial applications where sliding action of parts is required, such as with bearings, gears, slide plates, etc. In these applications, it delivers significantly better performance than nylon or acetal. The PTFE tapes market is marked with intense competition due to the presence of a large number of players. New product launches and acquisitions are the key strategies adopted by market players to expand their business in the industry. The PTFE tapes market is dominated by several large players such as 3M, Saint-Gobain, Henkel, Berry, Nitto, Technetics Group, A. W. Chesterton Company, Dixon Valve, Oatey, DeWAL Industries (Rogers), RectorSeal, SSP Corporation, Gasoila Chemicals, JC Whitlam Manufacturing, Electro Tape and so on.

Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this area, the future will still have more new investment enter the field. Even so, the market is intensely competitive. The study group recommends the new entrants just having money but without technical advantage and

upstream and downstream support do not to enter into this field.

Over the next five years, LPI(LP Information) projects that PTFE Tapes will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
