## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global PVDC market for 2018-2023.

Polyvinylidene Chloride (Abbreviation: PVDC) is a homopolymer of vinylidene chloride. It is a remarkable barrier against water, oxygen and aromas. It has a superior chemical resistance to alkalies and acids, is insoluble in oil and organic solvents, has very low moisture regain and is impervious to mold, bacteria, and insects. But it is soluble in polar solvents.

Currently, there are several producing companies in the world PVDC industry. The main players are SK (Dow), Kureha, Solvay, Asahi Kasei and Juhua Group. The global sales of PVDC increases to 202412 MT in 2017 from 165095 MT in 2012 with average growth rate of 4.17%.

In consumption market, USA and China are the mainly consumption regions due to the bigger demand of downstream applications. In 2016, these two regions occupied 60.12% of the global consumption volume in total.

PVDC has two forms, which include PVDC resins and PVDC latex. And each type has different applications relatively with different properties. With advantages of PVDC, the downstream application industries will need more PVDC products. So, PVDC has a huge market potential in the future.

Over the next five years, LPI(LP Information) projects that PVDC will register a 3.2% CAGR in terms of revenue, reach US\$ 900 million by 2023, from US\$ 750 million in 2017.

This report presents a comprehensive overview, market shares, and growth opportunities of PVDC market by product type, application, key manufacturers and key regions.
