In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Quartz Stone market for 2018-2023.

Quartz stone is made from either a natural slab that has been polished or engineered quartz composite. Quartz is one of the hardest natural materials on earth and has an appearance similar to granite. It is comprised of silicon dioxide. Pure, natural quartz slabs are very expensive and are therefore quite uncommon as countertops. The engineered type is made of 93 to 97 percent ground quartz combined with resins, binders and pigments. This combination is poured into molds and allowed to harden, then finished into the shape and style desired. This type of counter is much more affordable and common than the natural slab. The Quartz stone is used for kitchen and bathroom counters, no matter in personal home or commercial establishments or other industries.

Quality Quartz Stone is used for a range of applications such as kitchen countertops, bathroom vanities and counters, and custom solutions for home and commercial interiors. Recently Quartz Stone has acquired increasing significance in various fields of residential Quartz Stone and commercial Quartz Stone. Globally, the Quartz Stone market is mainly driven by growing demand for residential Quartz Stone which accounts for nearly 60.90% of total downstream consumption of Quartz Stone in global.

To increase the profitability and competitiveness, Quartz Stone manufacturers increased investment in the R&D and product design process. According to our forecast, the demand for Quartz Stone will slowly grow due to the increasing need for the rise of architectural decoration. This also means the new tech application may extensively change the traditional industry standard and bring more opportunities for

tech-oriented companies. While some manufacturers produce particular Quartz Stone to fit the consumers' demands.

The classifications of quartz stone are Quartz Stone surface, quartz stone tile, etc. It can be widely used in many industries. Survey results showed that 64.35% of the Quartz market is quartz surface in 2017.

Over the next five years, LPI(LP Information) projects that Quartz Stone will register a 12.4% CAGR in terms of revenue, reach US\$ 14800 million by 2023, from US\$ 7360 million in 2017.
