The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Roof Windows market for 2018-2023.

A roof window is an outward opening window that is incorporated as part of the design of a roof. Often confused with a skylight, a roof window differs in a few basic ways. A roof window is often a good option when there is a desire to allow both light and fresh air into the space.

A roof window tends to be larger than a skylight, making it possible to enjoy a wider view of the sky overhead. In addition, skylights are usually stationary; that is, they cannot be opened and closed. With some designs of a roof window, it is possible to retract a portion of the glazed panes to allow in fresh air as well as enjoy the natural light.

In the coming years there is an increasing demand for roof windows in the regions of America and Asia Pacific that is expected to drive the market for more advanced roof windows. Growth in government budgets in the construction fields expenditures, more-intense competition, launches in introducing new products, retrofitting and renovation of old technology, increasing adoption of roof windows will drive growth in America and Asia Pacific markets.

The roof windows industry market is very concentrated as the manufacturing technology of roof windows is matures than some high-tech equipment. And large enterprises like Velux, Fakro, Roto, etc. are well-known for the wonderful performance of their roof windows and related services, the top three companies have dominated about 87% market.

The consumption volume of roof windows is related to downstream industries and global economy. As there will always be some uncertain in the global economy in the

following years, the growth rate of roof windows industry may not keep that fast. But it is surely forecasted that the market of roof windows is still promising. The impact on the cost and availability of raw materials and certain components is uncertain due to potential supply changes. The costs of raw materials have a significant impact on the level of expenses. If the prices of raw materials and related factors such as energy prices increase, and if new companies cannot pass those price increases on to customers, their results of operations and financial condition would suffer.

Over the next five years, LPI(LP Information) projects that Roof Windows will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
