In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Rotary Kiln market for 2018-2023.

Rotary Kiln is a long steel cylinder with a refractory lining, supported on rollers so that it can rotate about its own axis, and erected with a slight inclination from the horizontal so that prepared raw materials fed into the higher end move to the lower end, where fuel is blown in by air blast. It is often used to treat hazardous waste through thermal destruction.

In our report, the price of products have big difference due to the product size, and the material, metal almost decide the price of a unit of rotary kiln, therefore, we statistic the Rotary Kilns' volume by weight.

The Major regions to produce Rotary Kiln are China, Europe and United States, which accounted for more than 80 % of production in total. The major consumption region also was China.

Rotary Kiln industry concentration is relatively high. The largest producer is Flsmidth, accounting for 7.79 percent market share in volume in 2014?followed by Metso and RHI. The industry competitive landscape is relatively stable.

Along with the development of Chinese domestic Industrial technology, Chinese Rotary Kiln has been made a lot of progress, and Some Chinese Players accounted big share of the global total production, but it also has a long way to be advanced in the world, especially in high quality and environment products.

Over the next five years, LPI(LP Information) projects that Rotary Kiln will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
