In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Rotary Lobe Pumps market for 2018-2023.

Rotary lobe pumps are non-contacting and have large pumping chambers, allowing them to handle solids such as cherries or olives without damage. They are also used to handle slurries, pastes, and a wide variety of other liquids. If wetted, they offer self-priming performance. A gentle pumping action minimizes product degradation. They also offer reversible flows and can operate dry for long periods of time. Flow is relatively independent of changes in process pressure, so output is constant and continuous. Over the next five years, LPI(LP Information) projects that Rotary Lobe Pumps will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
