The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Rotary Valve Actuator market for 2018-2023.

A rotary actuator is an actuator that produces a rotary motion or torque. The simplest actuator is purely mechanical, where linear motion in one direction gives rise to rotation. The most common actuators though are electrically powered. Other actuators may be powered by pneumatic or hydraulic power, or may use energy stored internally through springs.

The motion produced by an actuator may be either continuous rotation, as for an electric motor, or movement to a fixed angular position as for servomotors and stepper motors. A further form, the torque motor, does not necessarily produce any rotation but merely generates a precise torque which then either causes rotation, or is balanced by some opposing torque.

The Rotary Valve Actuator market has been studied for North America, Europe, Asia Pacific, Middle East, and Rest of the World (RoW). The Asia Pacific region is estimated to lead the Rotary Valve Actuator market in 2017, and the region is expected to be a driver of the global Internet of Things (IoT) in the coming years. IoT has been a focus area in emerging economies, such as India and China. The Indian government, for instance, has been pursuing its 'Digital India' initiative with a massive push towards IoT. This includes the establishment of smart cities and IoT-specific centers of excellence.

The significant investments incurred in the development of different types of Rotary Valve Actuator is a major factor restraining the growth of the Rotary Valve Actuator market across the globe. Significant investments are required at different stages of the value chain of the actuator industry (especially in R&D, manufacturing, system integration, and assembly stages).

Over the next five years, LPI(LP Information) projects that Rotary Valve Actuator will register a 3.0% CAGR in terms of revenue, reach US\$ 1490 million by 2023, from US\$ 1250 million in 2017.
