## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global SCR Denitrification Catalyst market for 2018-2023.

This report studies the SCR Denitrification Catalyst market, SCR Denitrification Catalyst is selective catalyst in denitrification system, to catalytically reduce NO<sub>x</sub> (mainly NO and NO<sub>2</sub>) to N<sub>2</sub> in presence of reduced agents, such as NH<sub>3</sub>.

SCR is today the dominant technology for the control of NO<sub>x</sub> in power industry, steel industry, cement industry, Transportation, metallurgy industry, etc.

In the report, cbm is equivalent to cubic meter.

China, USA, Japan and Germany are now the key producers of SCR denitrification catalyst in the world. The market growth is leading by China these years, Chinese production increased to 274 K cbm in 2017 from about 213 K cbm in 2013 with the CAGR of about 6.52%.

China is the largest consumption country of SCR denitrification catalyst products in the world in the past few years while the market share increased to about 63.7% in 2017 from 59.1% in 2013, and China will keep the leading position in the next few years.

North America, Europe and Japan took up about 30% the world in 2017, and the three markets increased slowly in 2013-2017, all CAGR of demand is less than 3%.

By the way, the SCR denitrification systems was installed for coal-fired power plants around 2013 in China, but it turned to be oversupply after 2015. And some of Chinese

players began to look for export market in 2016. The global price would be cut down if the Chinese SCR denitrification catalyst is widely accepted in the overseas market.

Over the next five years, LPI(LP Information) projects that SCR Denitrification Catalyst will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
