The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Seismic Isolation Systems market for 2018-2023.

This report studies the Seismic Isolation Systems market, Seismic Isolation Systems is the system used to reduce the effects of earthquake ground shaking on structure, their components and protect them from damaging. The system decouples the building or structure from the horizontal components of the ground motion by interposing structural elements with low horizontal stiffness between the structure and the foundation. This gives the structure a fundamental frequency that is much lower than both its fixed-base frequency and the predominant frequencies of the ground motion.

In the coming years there is an increasing demand for seismic isolation systems in the regions of Japan and China that is expected to drive the market for more advanced seismic isolation systems. Increasing of construction fields expenditures, more-intense competition, launches in introducing new products, increasing of spending on safety building, retrofitting and renovation of old technology, increasing adoption of seismic isolation systems in earthquake-prone areas will drive the growth of global market.

The consumption volume of seismic isolation systems is related to downstream industries and global economy. As there will always be some uncertain in the global economy in the following years, the growth rate of seismic isolation systems industry may not keep that fast. But it is surely forecasted that the market of seismic isolation systems is still promising.

The product average price declined in the past few years due to the technology development, the average price will keep the trend in the few future years due to

increasing mature manufacturing technology and lowering cost of raw materials. Over the next five years, LPI(LP Information) projects that Seismic Isolation Systems will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
