Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Shark Fin Antenna market for 2018-2023. Fin Type Antennas are shaped like shark fins, in contrast to conventional black rod type antennas, they were developed with an emphasis on design as to synchronize with the car body. These antennas are not prone to theft as they are fully attached to the car body, unlike rod type antennas which could be dismantled. Also, since they are short, drivers need not worry about bumping their antennas in garages with low ceilings. Europe is the largest production place, with a production market share nearly 30.6% in 2017. Following Europe, China is the second largest production place with the production market share of 23.4% in 2017.

Europe is the largest consumption place, with a consumption market share nearly 29% in 2017. Following Europe, North America is the second largest consumption place with the consumption market share of 23 % in 2017.

Over the next five years, LPI(LP Information) projects that Shark Fin Antenna will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
