## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Shot Peening Machine market for 2018-2023. Shot peening is a cold working process used to produce a compressive residual stress layer and modify mechanical properties of metals and composites. It entails impacting a surface with shot (round metallic, glass, or ceramic particles) with force sufficient to create plastic deformation.

As international economic situation is complicated, in the next few years there will be many uncertainties. Due to the government' policy and the high sales of Shot Peening Machines in the international market, the current demand for Shot Peening Machines product is relatively stable in the mature market, such as North America and Europe, but the demand in China is relatively higher due to the downstream demand.

Shot Peening Machines is mainly manufactured and sold by Wheelabrator, Rosler, Agtos, Sinto Pangborn; and these companies occupied about 64.57% market share in 2017.

Geographically, Asia-pacific is the largest sales market in the world, which took about 51.82 percent of the global consumption volume in 2017. But Europe shared 38.73% of global total revenue.

Over the next five years, LPI(LP Information) projects that Shot Peening Machine will register a 2.0% CAGR in terms of revenue, reach US\$ 430 million by 2023, from US\$ 380 million in 2017.
