In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Sifting Machine market for 2018-2023.

Sifting machine is a machine used to separate the products of grain milling by means of flat sieves that make successive circular movements on a horizontal plane.

The main parts of a sifting machine are the drive mechanism and the set of sieves mounted in the housing. Machines can have one or two housings, crank or self-balancing drive, and varying numbers of units where different mixtures can be simultaneously separated. The mixture being separated falls from one horizontal or sometimes slightly inclined sieve to another, is sifted, and forms usually from three to six groups, whose particles differ in size.

Globally, the Sifting Machine industry market is not that concentrated as the manufacturing technology of Sifting Machine is relatively much more mature than some high-tech equipment. But some enterprises are still well-known for the wonderful performance of their Sifting Machines and related services. At the same time, some countries such as Germany, UK and USA are remarkable in the global Sifting Machine industry because of their market share and technology status of Sifting Machine.

The consumption volume of Sifting Machine is related to downstream industries and global economy. As there will always be some uncertain in the global economy in the following years, the growth rate of Sifting Machine industry may not keep that fast. But it is surely forecasted that the market of Sifting Machine is still promising.

The product average price declined in the past few years due to the market competition and the average price will keep the trend in the few future years due to most of Chinese manufacturers will enter the industry.

Although the market competition of Sifting Machine is fierce globally, there are many

enterprises can obtain considerable profit from the manufacturing and marketing of Sifting Machine and that is the reason that we believe there will also be enterprises enter this market. But it is suggested that enterprises those have plans to enter this industry have careful analysis of this market and the advantages or disadvantages of themselves.

Over the next five years, LPI(LP Information) projects that Sifting Machine will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
