Silicone Injection Molding Machine is kind of injection molding machine, molded parts made from liquid silicone (LSR) or solid silicone (HTV) are extremely elastic, odorless and tasteless, chemical, UV, ageing and temperature resistant.

The technology and production volume of Silicone Injection Molding Machine are both being advanced by the downstream demand. And more and more foreign companies choose to build factories in China. Currently, most of the market of Silicone Injection Molding Machine is occupied by foreign giants, and China domestic enterprises are facing a lack of competitiveness. China is the largest production and consumption market, but there is a big gap in technology and price level.

To be object, the quality and performance of the Silicone Injection Molding Machine produced by China domestic manufacturers are still not as nice as those produced by enterprises from Japan, Germany or the United States. At present, some China domestic companies are committed to technology development and innovation in order to improve their product quality and gain larger market share.

About the product, according to our research, Vertical Silicone injection molding machine (VIMM) occupied a relative large market share, the manufacturer from China mainly produced the VIMM.

Over the next five years, LPI(LP Information) projects that Silicone Injection Molding Machine will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
