In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Solar Carport market for 2018-2023.

Solar Carport in letters a sort of carport with solar panel mounted on the top. Solar carport is another form of solar system. Unlike the other PV systems, the solar carport systems also provide the users shades for parking their cars by raising the installing height of the solar panels. Furthermore, solar carports can be reliable power resources for the surrounding lights and buildings.

However, the accumulative installation of Solar Carport is still low in some regions, such as Japan and Europe. For another hand, with the increasing application of electric car, it is expected the installation of Solar Carport will have huge increase in many parts of the global.

For the manufacturers, USA suppliers of Solar Carport still have absolutely market share. Solaire, SunEdison and Envision Solar are still the leaders in Solar Carport industry. USA manufacturers take up about 60% of the global installation. Europe manufacturers, such as Schletter and Phoenix Solar have increased installation capacity. For Chinese suppliers of Solar Carport, R&D and manufacturing of the production is just in recent years, therefore, the capacity is low. However, as the government is focusing on the energy saving, the consumption of Solar Carport will increase in the next few years. For example, SAIC MOTOR developed about 50MW Solar Carport in Nanjing and Shanghai 2013, and the company also developed a 10.213MW Solar Carport in 2014, which showed a promising prospect.

Over the next five years, LPI(LP Information) projects that Solar Carport will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in

2017.
