In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Solar EVA market for 2018-2023.

EVA sheet is an indispensable key material in PV module because of its two major functions in the solar cell module: completely connecting glass, cells and back sheets and completely protecting cells from moisture and dust.

For the global market, Japan and Korea still the large suppliers of Solar EVA. For the two markets, the main business is Solar EVA export, though the PV installation of the two countries increases gradually. China is the largest Solar EVA import market, and with the surging PV installation, the import will rise relatively. India and the South East Asia has expanded capacity and production of Solar EVA, the trend is due to the raising PV installation in the regions. The PV market in Asia has exhibited great hope for PV investors; as a result, we predict that Asia, especially China will be the largest market of Solar EVA industry.

Over the next five years, LPI(LP Information) projects that Solar EVA will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
