## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Soldering Flux Paste market for 2018-2023. Soldering flux paste is designed for electronics soldering and industrial soldering. Soldering is a process whereby similar or dissimilar metals are joined using an alloy that typically includes a base of tin combined with lead, silver, copper, antimony, bismuth or indium.

At present, in the foreign industrial developed countries the soldering flux paste industry is generally at a more advanced level, the world's large enterprises are mainly concentrated in the Japan. Meanwhile, foreign companies have more mature equipment, strong R&D capability, and the technical level is also in a leading position. But in foreign companies the manufacturing cost is relatively high, compared with in China. So the manufacturing cost in developed countries is a disadvantage. As the production technology of soldering flux paste manufacturers in China continues to improve, the share of Chinese manufactures will be increasing, and the competitiveness in the international market will also gradually increase.

Currently China has become international soldering flux paste large consumption country, but the production technology is relatively laggard, the manufacturers can only produce some low-end product, although after 2010 the new production lines is expanding, the technology is still relying on import.

The soldering flux paste is mainly used in electronics industry and industrial soldering. As the electronics industry develops, there is a growing demand to increase the package density of components on a substrate. Along with this, performance and quality requirements for soldering flux paste have become more demanding.

Over the next five years, LPI(LP Information) projects that Soldering Flux Paste will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
