The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Soldering Robot market for 2018-2023.

Soldering robot is a machine to finish Soldering. Soldering is a process in which two or more items (usually metal) are joined together by melting and putting a filler metal (solder) into the joint, the filler metal having a lower melting point than the adjoining metal. Soldering differs from welding in that soldering does not involve melting the work pieces. In brazing, the filler metal melts at a higher temperature, but the work piece metal does not melt. In the past, nearly all solders contained lead, but environmental and health concerns have increasingly dictated use of lead-free alloys for electronics and plumbing purposes.

The classification of Soldering Robot includes 4-axis Robot, 3-axis Robot, etc. The production proportion of 4-axis Robot in 2017 was about 62%, and the proportion is in increasing trend from 2013 to 2017 as the technology is mature. Soldering Robot is widely used in Consumer Electronics, Appliances Electronics, Automotive Electronics, etc. The most proportion of Soldering Robot is Consumer Electronics and consumer electronic is also the largest driver factor of soldering robot.

With the fast development of technology, China has been the largest supplier of Soldering Robot, with a production market share nearly 48.5% in 2017. Japan is the second largest supplier of Soldering Robot, and it has the largest production value market share as the higher price..

China is also the largest consumption place, with a consumption market share nearly 31.85% in 2017. Following China, other Asia regions like Southeast Asia, India, Japan, Korea and Taiwan are also the important consumption place.

Over the next five years, LPI(LP Information) projects that Soldering Robot will register a 5.7% CAGR in terms of revenue, reach US\$ 140 million by 2023, from US\$ 100 million in 2017.
