In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Spring Brake Chamber market for 2018-2023. A spring-brake chamber functions as a service-brake chamber, which is an emergency brake in case of air-pressure loss somewhere in the system, and as a reliable spring-applied parking brake.

Spring brakes are installed in the same manner as service brakes and are always installed on the front tandem axle.

Spring brakes are often installed on both rear axles in a tandem-axle unit. They are a reliable parking brake because they are held on by spring pressure and require no air.

Over the next five years, LPI(LP Information) projects that Spring Brake Chamber will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
