In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Stainless Steel Plate market for 2018-2023.

Stainless steel plate refers to steel plate those are resistant to atmospheric, steam, water, acid, alkali, salt and other corrosion medium.

According to the organization structure and chemical composition, stainless steel plate can be divided into martensitic stainless steel plate, ferritic stainless steel plate, austenitic stainless steel plate, duplex (ferritic-austenitic) stainless steels plate, precipitation-hardening stainless steel plate.

Due to the serious overcapacity and demand growth tend to be slow; the gross margin of steel industry has declined at a very low level as well as the gross margin of stainless steel plate industry. Though China government has published supporting policy in order to increase China local demand, its serious overcapacity can not be digested. It is forecasted the development of steel industry in the future is still not good.

There is also a certain space of stainless steel plate product demand, but basically the market shows scarcity of high-end products and excess capacity of low-end products. There is a large market demand for high-end products.

Although the manufacturing and marketing of stainless steel plate may bring opportunities for related enterprises, the study group recommends that enterprise those have fund advantage but lack technical and downstream support advantage do not

enter into the stainless steel plate field before careful investigation.

Over the next five years, LPI(LP Information) projects that Stainless Steel Plate will register a xx% CAGR in terms of revenue, reach US\$ 46500 million by 2023, from US\$ 46500 million in 2017.
