## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Sucralose market for 2018-2023.

Sucralose is the only new functional sweeteners with cane sugar as raw material after chlorination, which is one of the best sweeteners. It can be used in food, medicine, pesticide and animal feed.

The original trademark name is Splenda. Sucralose has no energy, high sweetness, sweet taste pure, high security, etc.

At present, the major manufacturer of Sucralose is Tate & Lyle. But at the same time due to performance of Sucralose and mainly consumption in USA, Tate & Lyle's monopoly on the global sucralose market is more than 50%.

As the prices of the main raw material sugar are relatively stable (may be slightly decreased), and the form of sucralose domestic oversupply becomes increasingly evident, so within the next five years, the domestic price of sucralose will be at a slight downward trend.

From a global perspective, the use of sucralose becomes more and more common, consumption of sucralose during next five years will increase, but prices will not rise sharply.

Over the next five years, LPI (LP Information) projects that Sucralose will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.

This report presents a comprehensive overview, market shares, and growth opportunities of Sucralose market by product type, application, key manufacturers and key regions.
