Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Support market for 2018-2023.

Support brace is a device used to restrict or assist body movement. A support brace can be constructed by numerous fabrics, elastic or even alloy components. A support brace can be used in combination or instead of supporting tape or strapping. For more specific supportive brace advice applicable to your injury, please consult your physiotherapist. In some cases, a brace may delay your rehabilitation process.

The China average price of Support is in the increasing trend, from 11.18 USD/Unit in 2013 to 12.08 USD/Unit in 2017. The product average price increased in the past few years due to the technology development and upturn living standards.

The classification of support includes knee, back, ankle, wrist and other support. And the proportion of knee support in 2017 is about 44.78%, which is the most used type in china. Support is widely used in hospitals and sports.

Over the next five years, LPI(LP Information) projects that Support will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
