Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Swimming Pool Chemical market for 2018-2023.

A pool's filter system does the work to keeping the water clean, but it takes chemistry to do the fine-tuning. It's important to carefully manipulate the chemical balance in pools for several reasons. One reason is that pathogens, such as bacteria, thrive in water. A pool filled with untreated water would be a perfect place for disease-carrying microorganisms to move from one person to another. Also, water with the wrong chemical balance can damage the various parts of the pool. In addition, improperly balanced water can irritate the skin and eyes. Improperly balanced water can also get very cloudy.

Swimming pool treatment chemicals is necessary. In this report, we mainly research beaching powder, sodium hypochlorite, liquid chlorine and trichloroisocyanuric acid (TCCA) etc.

Swimming pool treatment chemicals have many different types, such as beaching powder, sodium hypochlorite, liquid chlorine, trichloroisocyanuric acid and other specialty product etc. Those materials are mainly used to ensure the health and safety of swimming pool. During them, sodium hypochlorite is the most widely used material, with a consumption amount of 313.5 K MT in 2017. Trichloroisocyanuric acid is the second largest consumption material.

Swimming pool treatment chemicals are used in residential pool and commercial pool. In United States, there are 10.4 million residential and 309000 public swimming pools according to Association of Pool & Spa Professionals. So, Swimming Pool Treatment Chemicals are generally used in residential pool in USA. According to our research, in

2017, amount of swimming pool treatment chemicals used in residential pool is about 573.7 K MT, took a consumption share of 79.01%.

Swimming pool treatment chemicals are consumed all over the world. During all regions, North America, which is the largest consumption region, consumed 435.8 K MT in 2017. Followed by Europe, consumed 135.2 K MT in 2017. Global regional consumption amount is related to swimming pool amount.

Over the next five years, LPI(LP Information) projects that Swimming Pool Chemical will register a 1.5% CAGR in terms of revenue, reach US\$ 1160 million by 2023, from US\$ 1060 million in 2017.
