Tea Bag is a small, porous, sealed bag containing dried plant material, which is immersed in boiling water to make a hot drink. Classically these are tea leaves, but the term is also used for herbal teas (tisanes) made of herbs or spices. Tea bags are commonly made of filter paper or food-grade plastic, or occasionally of silk. The bag contains the tea leaves while the tea is steeped, making it easier to dispose of the leaves, and performs the same function as a tea infuser. Some tea bags have an attached piece of string with a paper label at the top that assists in removing the bag while also displaying the brand or variety of tea.

The classification of Tea Bag includes Black Tea, Green Tea, Flavor Tea, Herbal Tea and Others, and the proportion of Black Tea in 2016 is about 66%. The applications of Tea Bag are mainly commercial and individual. And the proportion of commercial and individual account for 91% in 2016.
