Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information studies the present scenario (with the base year being 2017) and the growth prospects of global Telemedicine market for 2018-2023.

Telemedicine is the use of telecommunication and information technology to provide clinical health care from a distance

The market is driven by the need for better healthcare in rural areas, tremendous growth in telecommunication, rising prevalence of chronic diseases in BRIC nations, and low cost of telemedicine. However, high infrastructural costs and lack of skilled resources may restrain market growth to a certain extent. On the other hand, favorable government initiatives present a huge growth potential for telemedicine in the BRIC nations. Lack of telemedicine standards in the BRIC countries may pose a challenge to the growth of BRIC telemedicine market.

Over the next five years, LPI(LP Information) projects that Telemedicine will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.

This report presents a comprehensive overview, market shares and growth opportunities of Telemedicine market by product type, application, key companies and key regions.
