The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Thermoplastic Prepreg market for 2018-2023. Thermoplastic prepregs are composite reinforcements (fiberglass, carbon fiber, aramid, etc.) that are pre-impregnated with thermoplastic resin. Common resins for thermoplastic prepregs include PP, PET, PE, PPS, and PEEK. Thermoplastic prepregs can be provided in unidirectional tape, or in fabrics that are woven or stitched.

Global thermoplastic prepreg consumption market, by geography is segmented into Europe, North America, Asia-Pacific, South America, Middle East, and Africa. North America and Europe belong to the larger producers, which together account for more than 61.8% of global consumption in 2016. As for top sales revenue countries, Europe accounted 32.67% of global thermoplastic prepreg sales income in 2016, while North America ranked second position with about 30.68 % share.

There are mainly three types of thermoplastic prepreg in the market: glass fiber, carbon fiber and aramid fiber. Glass fiber type is cheap. Glass fiber type accounted 40.98% global market share in 2016.

Thermoplastic prepreg has a large market around the world. The thermoplastic prepreg industry will develop stably in the future, especially in the developing countries.

Business distribution channels are the avenues a business uses to sell or deliver its product or service. Distribution channels for sellers of products include brick-and-mortar stores, online stores, direct mail solicitations, catalogs, sales reps, wholesalers, distributors and direct response advertising. Service providers don't offer something a consumer can touch, feel and put in a bag, so if you're selling a service, you must figure out additional ways to deliver it.

Over the next five years, LPI(LP Information) projects that Thermoplastic Prepreg will register a 7.3% CAGR in terms of revenue, reach US\$ 1070 million by 2023, from US\$ 700 million in 2017.
