The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Torque Wrench market for 2018-2023.

A torque wrench is a tool used to precisely apply a specific torque to a fastener such as a nut or bolt. It is usually in the form of a socket wrench with special internal mechanisms.

A torque wrench is used where the tightness of screws and bolts is crucial. It allows the operator to measure the torque applied to the fastener so it can be matched to the specifications for a particular application. This permits proper tension and loading of all parts. A torque wrench measures torque as a proxy for bolt tension. The technique suffers from inaccuracy due to inconsistent or uncalibrated friction between the fastener and its mating hole. Measuring bolt tension (bolt stretch) is more accurate but often torque is the only practical means of measurement.

Indirect marketing, also means distribution, is an important supplement of direct marketing. Today, in certain consumer goods industry, distribution has been the major marketing channel. Through sign specific contact with the professional retailers, manufacturers can get more orders without extra cost on marketing. Certainly, the distributors will occupy part profit among the marketing of products.

When the manufacturers entered into a target market, find some professional distributors can be useful. These distributors have a clearer sense of the local market. The most prominent feature of modern marketing is the e-commerce. E-commerce is the buying and selling of goods and services over an electronic network, primarily the internet. These business transactions occur either as business-to-business (B2B), business-to-consumer (B2C), consumer-to-consumer or consumer-to-business. As the fast development of internet technology, E-commerce is becoming more and

more popular. Most manufacturers have built their sales website or operated an official sales store in the ecommerce platform. E-commerce can decrease the investment on solid stores and manufacturers can get the market sales conditions easily as the sales data can be counted easily.

Over the next five years, LPI(LP Information) projects that Torque Wrench will register a 4.1% CAGR in terms of revenue, reach US\$ 7560 million by 2023, from US\$ 5930 million in 2017.
