## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information studies the present scenario (with the base year being 2017) and the growth prospects of global Train Communication Gateways Systems market for 2018-2023.

Train communication gateways systems enable the exchange of information throughout the train. Gateways help to connect to the train communication network. They are also called protocol converters and may communicate using more than one protocol. There are two interface buses used in the TCN: Vehicle bus: Used for intra-vehicle communication, and Train bus: Used for wide information exchange. The wire train bus (WTB) gateway is used as a train bus, and a multifunction vehicle bus (MVB) gateway is used as a vehicle bus. Gateway bus technologies such as controller area network (CAN), serial links, and Ethernet train bus (ETB) are used as a vehicle bus. They provide larger bandwidths and a flexible network.

China has the largest global export quantity and manufacturers in Train Communication Gateways Systems market, while the Europe is the second sales volume market for Train Communication Gateways Systems in 2017.

Nowadays, there are three mainly types of Train Communication Gateways Systems, including Wire Train Bus (WTB) Gateway, Multifunction Vehicle Bus (MVB) Gateway and Others. And Wire Train Bus (WTB) Gateway is the main type for Train Communication Gateways Systems, and the Wire Train Bus (WTB) Gateway reached a sales value of approximately 25.13 M USD in 2017, with 52.06% of global sales volume. Train Communication Gateways Systems technology is much mature now, and new enterprises can not surpass existing famous brands on reputation or design in the short term. So, the study group recommends the new entrants need to be considered

carefully before enter into this field.

Over the next five years, LPI(LP Information) projects that Train Communication Gateways Systems will register a 25.0% CAGR in terms of revenue, reach US\$ 180 million by 2023, from US\$ 46 million in 2017.
