In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Trencher market for 2018-2023.

A trencher is a piece of construction equipment used to dig trenches, especially for laying pipes or cables, for installing drainage, or in preparation for trench warfare.

Trenchers may range in size from walk-behind models, to attachments for a skid loader or tractor, to very heavy tracked heavy equipment.

First, the trencher industry concentration is high. North America is the biggest producer and consumer of trencher. There are no more than fifty manufacturers in the world, and high-end products mainly come from USA and European.

In the world wide, giant manufactures mainly distribute in Europe and America.

American and Europe has a long history and unshakable status in this industry, like Ditch Witch, Vermeer and Tesmec. They have perfect products.

Second, the import and export percent of this industry is high. Also, some foreign companies are willing to set plants in China due to its low labor price and more opportunities.

Over the next five years, LPI(LP Information) projects that Trencher will register a 1.3% CAGR in terms of revenue, reach US\$ 49 million by 2023, from US\$ 45 million in 2017.

This report presents a comprehensive overview, market shares, and growth opportunities of Trencher market by product type, application, key manufacturers and key regions.
