About 10% of latent infections progress to active disease which, if left untreated, kills about half of those infected. The classic symptoms of active TB are a chronic cough with blood-containing sputum, fever, night sweats, and weight loss. The historical term "consumption" came about due to the weight loss. Infection of other organs can cause a wide range of symptoms.

The classification of Tuberculosis diagnostics includes culture-based diagnostics, sputum smear microscopy diagnostics, rapid molecular diagnostics and so on. And the proportion of Culture-based Diagnostic in 2017 is about 34.84%, and the proportion is in decreasing trend from 2013 to 2017.
