In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Twin-screw Extruders market for 2018-2023. Twin-screw extruders are well-established in the industry for mixing, compounding and processing of viscous materials. They are used in a great variety of polymer, pharmaceutical and food applications. The flexibility of twin-screw extrusion equipment allows designing these machines specifically to the desired task. Twin-screw extruders can have a conical or parallel design. The two screws can be counter-rotating or co-rotating, intermeshing or nonintermeshing. The twin-screw extruders are used mainly for processing PVC products, such as pipe, profile, sheet, pellets and film. The co-rotating units are used for compounding materials where thorough mixing is important

Over the next five years, LPI(LP Information) projects that Twin-screw Extruders will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
