In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Urokinase market for 2018-2023.

Urokinase, also known as urokinase-type plasminogen activator (uPA), is a serine protease present in humans and other animals. The human urokinase protein was discovered, but not named, by McFarlane and Pilling in 1947. Urokinase was originally isolated from human urine, and it is also present in the blood and in the extracellular matrix of many tissues. The primary physiological substrate of this enzyme is plasminogen, which is an inactive form (zymogen) of the serine protease plasmin.

The global Urokinase industry has a rather high concentration. The major manufacturers are concentrated in China, such as NDPharm, Wanhua Biochem, Jiangxi Haoran Bio-Pharma and Jiangsu Aidea Pharmaceutica. At present, NDPharm is the world leader, holding 61.93% production market share in 2016.

In 2016, the global Urokinase consumption market is led by China and China is the largest region consumption market, accounting for about 18.58% of global consumption of Urokinase.

Urokinase downstream is wide and recently Urokinase has acquired increasing significance in various fields of Hospital, Clinic and others. Globally, the Urokinase market is mainly driven by growing demand for Hospital. Hospital accounts for nearly 78.59% of total downstream consumption of Urokinase in global.

Over the next five years, LPI(LP Information) projects that Urokinase will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
