In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global UV Lasers market for 2018-2023.

UV Laser is a device which emits the light in UV range. It has become the mainstream work horse in the industrial revolution. From research and development to biotechnology and beyond, UV Lasers is the backbone to manufacturing most of today's consumer goods.

As for the global UV laser industry, the industry structure is relatively stable. The top three manufacturers have 44.84% revenue market share in 2015. The USA giant Coherent, which has 17.44% market share in 2015, is the leader in the UV laser industry. The manufacturers following Coherent are Rofin and Spectra-Physics, which respectively has 14.80% and 12.59% market share globally. The Huaray Laser is the leader of China UV laser industry.

The downstream industries of UV laser products are marking, cutting and drilling. In the recent years, with the recovery of global economic, the development of emerging countries and the spurring of individual spending, the consumption increase of UV laser will be obvious. In the foreseeable future, the UV laser products will show an optimistic upward trend.

Although sales of UV laser products bring a lot of opportunities, the study group recommends the new entrants who just have money but without technical advantage, raw materials advantage and downstream support, do not enter into the UV laser field hastily.

Over the next five years, LPI(LP Information) projects that UV Lasers will register a 10.0% CAGR in terms of revenue, reach US\$ 400 million by 2023, from US\$ 230 million

in 2017.
