In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global VCI Film market for 2018-2023.

VCI Film market, Corrosion inhibitors can be applied to items to help prevent rust and corrosion. Volatile corrosion inhibitors (VCI) or vapor phase corrosion inhibitors can be provided inside a package in a pouch or can be incorporated in a saturated overwrap of special paper. Many of these are organic salts that condense on the metal to resist corrosion. Some films also have VCI emitting capability.

Films are available with copper ions in the polymer structure, these neutralize the corrosive gas in a package and deter rust.

The Major regions to produce VCI Film are North America, Europe and China. North America is the largest production in volume (production share 33.65% % in 2016). VCI Film is mainly produced by Cortec, Aicello Corporation, NTIC, MetPro Group, Branopac, Nokstop Chem, Daubert, etc. Cortec is the biggest supplier, followed by Aicello Corporation.

Along with the development of Machinery Industry and Electronic industry, North America, Europe, Asia-Pacific are major consumption regions in VCI Film market. The largest consumption region is North America, accounting for 31.04% market share in 2016 by consumption volume. Asia-Pacific is a promising region to be the fastest developing consumption region in the next few years.

Although sales of VCI Film brought a lot of opportunities, the industry barrier is rather high. Therefore, the study group recommends the new entrants who just having money but without technical advantage and downstream support, do not to enter into the VCI Film field hastily.

Over the next five years, LPI(LP Information) projects that VCI Film will register a 4.6%
